Stop Planned Parenthood now

From Marian Bourek
Farley, Iowa

While it's common for advocates of "family planning" services to claim that Planned Parenthood isn't just about abortion, the organization's own actions refute that claim.

Planned Parenthood not only performs the greatest number of surgical abortions, but is at the forefront of promoting and dispensing drugs such as the "morning after pill," which causes an early chemical abortion.

Abortion by any name, at any time, still kills a child.

We often hear individuals linked with Planned Parenthood say that "no one likes abortion," yet without legalized abortion, Planned Parenthood's finances would suffer so substantially they wouldn't ever be able to consider expanding into Dubuque County.

Planned Parenthood is the leading agent behind every pro-abortion bill ever considered in Iowa and around the nation. Similarly, they are the first to lobby to strip parents of their rights to know anything about the health of their children, including the right to know if their children are about to undergo a dangerous, sometimes life-threatening surgery which ends the life of a defenseless child.

For the sale of Dubuque County's children (born and unborn) and families, it's time to say no to Planned Parenthood's deadly agenda once and for all.
